

Wednesday 5.15 pm
Center for Optical
Quantum Technologies
Seminar room

SFB/ZOQ Seminar

Summer term 2016

- ❖ 4 May – Michael Oestreich, Leibniz Universität Hannover „Optical detection of spin noise in artificial atoms“
- ❖ 1 June – Ignacio Cirac, Max-Planck-Institut für Quantenoptik, Garching „Quantum Optics close to dielectric materials“; **Time Change: 2 pm**
- ❖ 8 June – Janez Bonca, University of Ljubljana „Relaxation and thermalization in many-body systems coupled to different bosonic degrees of freedom“
- ❖ 22 June – Maria Krikunova, Technische Universität Berlin, „Dynamics of XUV induced nanoplasma as revealed by THz streaking“
- ❖ 29 June – Markus Greiner, Harvard University, „NN“

Universität Hamburg, Luruper Chaussee 149, 22761 Hamburg
