

2 February 2023, 14:00–15:00h
CFEL (Bldg. 99) seminar room I+II

Bodil Holst

Department of Physics and Technology, University of Bergen, Norway

Scientific Paper Writing

Doing Science is difficult enough, but writing about it and getting it published can feel even more difficult. How can I write a good abstract? How can I organise my results? Which journal should I publish in? and last but not least – how can I handle the referee comments in the most strategic manner and maybe even turn an initial rejection into acceptance? In this humorous presentation Bodil Holst takes you through some of the challenges of scientific paper writing. The talk is based on her book: *Scientific Paper Writing: A Survival guide* illustrated by Jorge Cham the creator of PhD Comics.
